

# Samecoin

Our mission is to put crypto into every person and business owner's pocket, without taking the centralisation shortcut that so many have done before.

We are building an ecosystem of products and decentralised stablecoins.

## Solutions

### Samecoin

The powerful utility token and family of stablecoins powering the Samecoin ecosystem.

### Samecoin Protocol

The only DeFi stablecoins protocol supported by a suite of products.

### SamePay

The first crypto wallet app aimed at bringing crypto into everybody's pocket.

### SameID

Access your crypto wallets from anywhere, with the first account system that has logins verified on the blockchain.

## What is used for?

Samecoin is the utility token of the Samecoin ecosystem, built on the BSC blockchain.

Get Samecoin rewards when minting, saving and staking SameUSD on the Samecoin Dapp

Use Samecoin to pay for transaction fees on SamePay to get a 50% discount and exclusive promotions from SamePay partners.

Quarterly token burns and halving of rewards keeps the circulating supply from inflation and stabilises the token price.

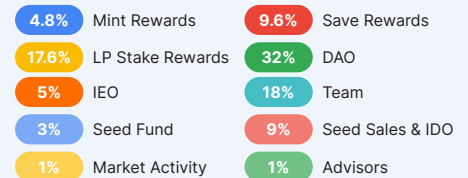

Use Samecoin to propose changes and vote on proposals and be part of Samecoin's governance.
